

MILANI KAVEESHA

Aspiring Full-Stack Software Engineer | AI & Machine Learning

0713285364 • milanikaveesha.9@gmail.com • Borelasgamuwa, Sri Lanka

[LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFILE

Software Engineering undergraduate specializing in full-stack development (MERN, CodeIgniter, PHP) with hands-on AI/ML exposure using Python and TensorFlow. Delivered production features for inventory, ticketing, and finance systems during an internship, and built a complete MERN application independently. Strong on clean backend architecture, REST API design, and turning ambiguous requirements into working software fast.

CORE SKILLS

Languages: Java, JavaScript, TypeScript Python, PHP, SQL, Vanilla JS

Frontend: React.js, HTML5, CSS3, Bootstrap, Astro

Backend: Node.js, Express.js, CodeIgniter 4, REST APIs, JWT Authentication

Databases: MySQL, MongoDB, PostgreSQL, Prisma / Mongoose

AI / ML: Python (AI/ML), TensorFlow, Model Training, Data Preprocessing

Tools: Git, GitHub, Postman, Microsoft Azure, VS Code, Power BI

PROFESSIONAL EXPERIENCE

Software Engineering Intern

Dec 2025 - Jun 2026

Sunquick Lanka

- Built and maintained internal business web applications (CodeIgniter 4, PHP, React, MySQL) supporting inventory, ticketing, and finance operations
- Implemented backend modules and validation logic for core business workflows, reducing manual processing steps for the finance and ticketing teams
- Integrated DataTables and optimized queries to handle large operational datasets without performance degradation
- Contributed to a QR-based dispenser management and maintenance tracking system with real-time data synchronization across mobile and web
- Partnered with cross-functional developers and support teams to debug production issues and streamline workflows, improving day-to-day usability
- Assisted with API integration connecting mobile and web platforms for synchronized operations
- Delivered responsive, Bootstrap-based UI components to improve frontend usability across devices

PERSONAL PROJECTS

FlavourFindr — Recipe Discovery Web App

MongoDB, Express.js, React.js, Node.js, JWT, REST APIs

- Built a full-stack MERN application that recommends recipes based on ingredients a user has on hand
- Designed and shipped RESTful APIs for recipe management, authentication, favorites, and user-generated content, secured with JWT and protected routes
- Built a responsive React.js frontend with dynamic filtering by cuisine, meal type, and dietary preference, backed by an ingredient-based search
- Connected external recipe APIs to enrich cooking instructions and nutritional data
- Structured the codebase into modular frontend/backend layers for scalability and maintainability; optimized for cross-device responsiveness

ArcadeLab — Interactive Web Arcade & Dynamic Theming Engine

Astro, TypeScript, Tailwind CSS, HTML5 Canvas, Web Audio API, JavaScript

- Built an interactive, high-performance browser arcade platform featuring custom 2D canvas games (Space Dodge, Shadow Protocol, Chroma Bloom) with 60 FPS physics loops, collision detection, and score tracking
- Engineered an automated 12-month seasonal theming engine utilizing particle physics and procedural shaders to dynamically alter typography, glassmorphic UI tokens, and visual effects
- Developed a zero-asset procedural sound synthesis system using the Web Audio API to generate real-time 8-bit soundscapes, ambient harmonics, and interactive SFX
- Implemented client-side state persistence and custom event buses for seamless instant theme switching, audio controls, and responsive UI across desktop and mobile devices
- Leveraged Astro's island architecture and Tailwind CSS v4 to deliver ultra-fast load times, near-zero baseline JavaScript hydration, and accessible micro-interactions

EDUCATION

BSc in Software Engineering <i>Cardiff Metropolitan University, UK (ICBT Campus)</i>	Nov 2025 - Aug 2026
Higher Diploma in Computing and Software Engineering <i>Cardiff Metropolitan University, UK (ICBT Campus)</i>	Nov 2023 - Aug 2025
Diploma in IT <i>ICBT Campus</i>	May 2023 - Nov 2023

ADDITIONAL SKILLS

REST APIs • JWT Authentication • CRUD Operations • Responsive Web Design • Full-Stack Development • Data Preprocessing • Model Training

SOFT SKILLS

Communication • Teamwork & Collaboration • Adaptability • Attention to Detail • Willingness to Learn
